Personality disorders produce patterns of maladaptive behavior. Many therapeutic techniques fail in treating these disorders because the techniques do not take into account consumers' perspectives as they hear, see, and experience the world differently. Participants will learn strength based and related approaches which promote recovery. Additionally the training addresses the incorporation of culturally sensitive strategies essential to the work with consumers diagnosed with personality disorders.

TARGET AUDIENCE: DMH Adult Providers and DMH contracted staff only

OBJECTIVES: As a result of attending this training, participants should be able to:

1. Explain the comorbid incident of personality disorders in homelessness and substance use
2. Utilize techniques beneficial in treatment with personality disorders
3. Explain how personality disorder impact recovery
4. Identify strength-based approaches useful in treatment of personality disorders
5. Identify the various personality clusters
6. Identify ways to provide culturally-sensitive treatment with consumers with personality diagnoses
